

Darius Morgan

San Diego, CA | (619) 555-0142 | darius@example.com | portfolio.example.com

EDUCATION

Pacific Valley University

Bachelor of Science in Computer Science | GPA: 3.8 / 4.0

San Diego, CA

May 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Machine Learning, Database Systems, Full-Stack Web Development, Computer Networks

Activities & Organizations: Coding Club (President), Engineering Society, Peer Tutoring Program

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express, FastAPI, PyTorch

Infrastructure & Tools: AWS, Docker, Git, PostgreSQL, Redis, MongoDB, REST APIs

EXPERIENCE

CloudPeak Software

May 2026 - Aug 2026

Software Engineer Intern, Customer Platform

San Francisco, CA

- Built a customer onboarding flow using **React and TypeScript**, helping 120 pilot users connect their accounts and complete setup without manual support.
- Created reusable form components and server-side validation, reducing incomplete onboarding submissions by **28%** during a six-week pilot.
- Resolved file-upload failures and duplicate account creation bugs by tracing API requests, adding error handling, and writing regression tests.
- Collaborated with design and product to ship four onboarding improvements; documented release steps and monitored errors after deployment.

BrightBridge Labs

Jun 2025 - Aug 2025

Software Engineer Intern

San Diego, CA

- Built an internal analytics dashboard with **React, Node.js, and PostgreSQL**, combining customer activity and support metrics in one interface.
- Reduced average dashboard load time from **3.2 seconds to 1.4 seconds** by indexing database queries and caching frequently requested results.
- Automated weekly reporting for a five-person operations team, saving approximately **4 hours per week** and removing manual spreadsheet updates.

CampusConnect

Jan 2026 - Present

Student Developer & Co-Founder

San Diego, CA

- Launched a campus event discovery app that lets students browse organizations, save events, and receive reminders; recruited **85 student testers**.
- Implemented authentication, event search, and organizer dashboards using Next.js and PostgreSQL; used tester feedback to simplify the event publishing flow.

Pacific Valley University, Robotics Lab

Feb 2025 - May 2025

Undergraduate Research Assistant

San Diego, CA

- Developed a **Python and C++** simulation pipeline for mobile robots; evaluated navigation performance across 40 test scenarios and reduced average path deviation by **18%**.

PROJECTS

StudyStack | Next.js, Python, Vector Search

Campus Hackathon Finalist

- Built a study assistant that searches uploaded lecture notes and returns answers with source references; tested retrieval quality against **100 student-written questions**.
- Added document chunking, embedding search, and file validation to support searchable notes across multiple classes.

InterviewReady | React, FastAPI, AWS

Personal Project

- Created a mock interview platform that generates role-specific practice questions and saves recorded responses for review; deployed the API and frontend to AWS.

BudgetBuddy | Python, SQL, Streamlit

Team Project

- Built a spending dashboard that imports transaction CSVs, categorizes purchases, and visualizes monthly trends; added input validation and tests for malformed transaction data.
